Landscape Construction Site Supervisor

Company Description

Warburton Landscape Services Inc. takes pride in servicing high-end country properties in the beautiful rolling hills of Dufferin County. We are based near Orangeville, Ontario, one hour northwest of Toronto. We are a full service gardening outfit; design installation and maintenance.

In our gardens we use natural materials: stone dry laid for patios and retaining walls, cedar rounds and willow for structures. The gardens are plant centered and hand made. They often include food or fruit production. While naturalistic, our gardens are sophisticated in design and choice of plants. We also create stunning water features: streams, ponds and natural swimming pools.

Our gardens have appeared in major Canadian gardening magazines, on HG TV, and in several prominent American publications. You can find photos of completed projects on our Facebook page at:
